PROFESSIONAL SUMMARY

Full-stack developer and CSE undergraduate at SUST with production experience in React, Next.js, TypeScript, Node.js, and PostgreSQL. Lead developer of porisshromi.com, a live admission-prep platform with 15,000+ MCQs, and sole developer of a live e-commerce platform for an industrial client. Seeking software engineering internship or part-time roles.

EDUCATION

Shahjalal University of Science and Technology (SUST) - Sylhet, Bangladesh *Aug 2024 – Expected Feb 2029*
BSc in Computer Science & Engineering · CGPA: 3.56 / 4.00

EXPERIENCE

Lead Developer - Porisshromi *Oct 2026 – Present*
Gamified admission-prep platform · Next.js, React, TypeScript, Three.js, PostgreSQL, Prisma, Supabase · Live

- Led development of porisshromi.com, a live platform where Bangladeshi students practice 15,000+ real admission MCQs through 6 themed 3D game routes or a plain quiz mode.
- Designed a cheat-resistant exam engine with server-owned timing, one question sheet served at a time, exactly-once scoring, and no answer key sent before scoring.
- Made exams reliable on weak mobile networks with auto-submit, answer recovery, resumable starts, and automatic fallback from 3D to plain quiz without losing answers or time.
- Shipped teacher classrooms, a multi-day Medical Model Test, and bKash-based Pro subscriptions, protected by row-level security on every table and covered by 199 automated tests in CI.

Software QA Engineer Intern - AZAI Labs *Aug 2026 – Oct 2026*
Remote · Manual QA, Jira · LinkedIn

- Tested 6+ production and staging portals across two product ecosystems, finding issues in authentication, referrals, and pricing.
- Filed 300+ developer-actionable Jira tickets, consolidating bugs with a shared root cause into single reports.

Full-Stack Developer (Freelance) - Astha Engineering & Solutions *Apr 2026 – May 2026*
Industrial automation parts supplier · React, Node.js, Express, PostgreSQL, Prisma, Tailwind CSS · Live

- Sole developer of asthaengineering.com, a live e-commerce platform with a 500+ product catalog, from database to deployment.
- Built a REST API with 40+ endpoints, JWT refresh-token rotation, and role-based access control.
- Delivered an admin dashboard that lets non-technical staff manage products, categories, and repair jobs without code changes.

PROJECTS

Halioo - RAG Document Chatbot
React, Node.js, Express, PostgreSQL, pgvector, Prisma, Gemini API, LangChain · GitHub · Live

- Built a full-stack RAG chatbot that answers from users' uploaded PDF and TXT files, with source citations via pgvector search.
- Added SSE response streaming, JWT authentication with per-user data isolation, and persistent chat history.

QueueStorm - AI Support Copilot
Node.js, Express, Gemini API, Zod, Docker · GitHub · Live

- Built an AI ticket analyzer for financial-service support, combining rule-based decisions with LLM-generated replies to keep outcomes consistent when LLM output varies.
- Added a safety filter that blocks or rewrites unsafe replies, along with multi-key Gemini failover and Zod schema validation.

Oggrogoti - HSC Study Platform
Next.js, TypeScript, tRPC, Prisma, PostgreSQL, Redis, NextAuth, Vitest, Playwright · GitHub · Live

- Built chapter tracking, auto-graded quizzes, a confidence-vs-quiz mastery engine, and weighted leaderboards powered by an append-only points ledger, with unit and end-to-end test coverage.

SKILLS

Languages: TypeScript, JavaScript, C++, C, Java
Frontend: React, Next.js, Tailwind CSS, HTML
Backend: Node.js, Express, REST APIs, tRPC, JWT Authentication
Databases: PostgreSQL, MongoDB, Prisma, Supabase, Redis, pgvector
AI: RAG, LangChain, Gemini API
Tools & Testing: Git, GitHub Actions, Docker, Vitest, Playwright, Postman, Vercel

HACKATHONS & ACHIEVEMENTS

- **Finalist, BUP CSE FEST 2026 Hackathon:** Worked as a full-stack developer on a Fuel Supply Intelligence & Resilience Platform, a decision-making system for a simulated Bangladeshi fuel supply chain across depots, stations, and routes. · GitHub
- **Backend Lead, Hack For Health 2026:** Led the backend of ReLife, an AI-powered preventive healthcare platform built with MongoDB. · GitHub
- **Problem Solving:** Solved 250+ problems across LeetCode and Codeforces.
